Hi,

I was walking with my Mum and Dad in Belstead Meadows where I saw 25 butterflies. I saw Peacocks, Male Orange Tip, Commas, unidentified white, Holly Blue, Small Tortoiseshell, Speckled Wood and a Brimstone.
it was great to see so many species in the first walk of the year.

That's a very good species tally for the very beginning of April!

As Mike says that is a great haul for a single trip out at this time of year 😊

Have a goodun

Yes, an excellent return for a first outing. I still haven't seen Orange Tips yet myself, but hopefully that will change over the next few days.
